    1. Career site

Features:

Module 1.

- Career site
- Preview and Publish
- Responsive design control
- Edit information
- Setting
- Search job and Location
- Apply

What Career site?

1. a career site is a digital platform that helps organizations attract, engage, and hire talent by providing relevant information and a seamless application process.

   - Here are some key points about a career site:
     1. Information Hub
     2. Job Listings
     3. Application Portal
     4. Contact Information

Preview and Publish

1. The Preview button allows you to preview your page.
2. The Publish button allows you to Publish your page which we have made.

Responsive design control

1. This are allowing use to switch the editing on different screen sizes such as tablet or mobile.
2. You can have comprehensive editing to generate a polished page angle.
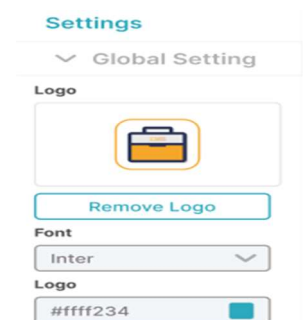

Edit information

1. If we click on edit information, we will able to Edit the information of the company.
2. Like we can edit the information like email, website etc.

Setting

1. Global Setting
   - In this setting we can change or remove the logo and edit the colour of the logo
   - Or we can edit the font

2. Header Setting
   - In this setting we can edit the header setting like we can change the header in 2 column or full width.
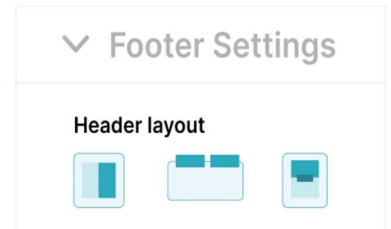

3. Job feed Setting
   - In this setting we can edit the job feed setting like we can change the appearance to card, table or borderless.
   - We also edit the button text and colour of the button.

4. Footer setting
   - In this setting we can edit the footer setting like we can change the appearance.

Job Opportunity

   - In this field we get the recommended job according to the search job, job type and experience
   - **Apply button**
     1. By clicking this button, we can apply to any of the favourite job you want to apply
